

LITMUS TEST

If your codebase were made public today, how many passwords, internal URLs, or other 'secrets' would be exposed?

CONFIGURATION

- build
- config
- node_modules
- public
- scripts
- src

⚙️ .env

📄 .gitignore

🚢 Dockerfile

{ } package.json

📖 README.md

🔒 yarn.lock

⚙️ .env x

⚙️ .env

```
1 REACT_APP_PUPPY_API_URL=https://omg-puppies.dev.foo
```

- ▶ Create a .env file for each environment
- ▶ Allows for granular control of application variables
